(423) 889-8742 Dale@DaleDriggs.com

Skills

Languages Java, Kotlin, Swift, C#, C, C++, COBOL, Python, Bash, TypeScript, JavaScript, HTML, CSS
Software Git, Subversion, VMware vSphere, ArcGIS, Ant, Maven, IntelliJ IDEA, Visual Studio, Sublime
Systems Debian, Ubuntu, RedHat, Fedora, Windows, Windows Server 2012, ESXi, OS X, ProxMox, unRaid
Frameworks & APIs Android SDK, AWS, Azure, VSTS, GitHub, .NET Core, VMware, Selenium, Alexa Skills

Experience

Application Architecture Team Lead VaxCare Corporation, *Orlando, FL* (April 2019 – Current)
Leads a team of developers engineering the VaxCare system, including application upgrades, migrations, and deprecations. Creating documentation on architectural decisions, performing root cause analysis on system deficiencies, and long term planning initiatives to provide business flexibility and support.

Team Lead, Mobile August 2022
Assisted in the procurement, development, and maintenance of the VaxHub2 Android tablet, working with multiple suppliers and contractors, utilizing Android OS, Kotlin, C#, Bash, and SQLite. Provided maintenance support to the legacy VaxHub1 tablet, Automated Vaccine Replenishment, and multiple internal tools for client support, inventory management & tracking, and OTA updating, using C#, Kotlin, Java, TFS, Git, JIRA ticketing, .NET Core, and MS SQL Server.

Senior Software Developer Platform Operations Team December 2021
Assisted in standing up the processes and requirements for a new developer-operations team, including access rights, roles, and accountability. Authored runbacks, SOPs, and escalation workflows to enable consistent and efficient incident response and deployment practices.

Senior Software Developer Solutions Team January 2021
Worked as a research and design engineer implementing ideas from the executive team and providing documentation and prototypes. Designed and facilitated facial recognition application given the limitations of existing hardware and connectivity states. Researched and prototyped an outreach program for contacting patients prior to visits that generated significant unanticipated financial returns during the initial rollout, exceeding projected outcomes and executive expectations.

Software Developer Inventory Team April 2019

Software Engineer CentralSquare Technologies, *Lake Mary, FL* (March 2018 – April 2019)
Led a team of developers and quality assurance personnel developing road map items across a 10M line code base, utilizing C#, .NET, C, C++, COBOL, TypeScript, and Angular. Led voice application team, utilizing C#, and creating Alexa skills. Led a team mitigating bugs and support requests across a dynamic front end environment. Identified and crafted tools to speed development and the paperwork requirements of an agile process, using C#, .NET core, and VSTS.

Software Engineer Leidos, *Orlando, FL* (May 2015 – March 2018)
Maintained and improved application for rapidly provisioning virtualized environments. Established the "Suitcase Cloud" platform, allowing for encrypted virtual machine datastores and abstracting the underlying network for the vSphere suite, using Java, Bash, Python, and is FIPS 140-2 compliant. Automated the STIG implementation for a multi-tier network application stack, using Python. Modified CyberNEXS platform, using Java, and supported its multiple events and sales presentations. Modified legacy Training-as-a-Service source for internal applications using Java. Virtualized and tested four Image Generators for proposal effort. Managed a small team to support multiple research projects. Developed internal testing application for regression of EDS CDPE, using Java, Selenium, JavaScript, Bash, VMware products, and Git.

Software Engineer Intern Burnett Honors College, *University of Central Florida* (January 2015 – May 2015)

Supervisor, Survey and Drafting, Staff Sergeant, *United States Air Force* (July 2005 – June 2013)
Supervised, trained, led, and motivated 15 personnel directly supporting the drafting, land surveying, and mapping requirements, using AutoCAD and ESRI's ArcGIS, for a 5000+ base populace. Developed internal tools for manipulation of geometric objects and their metadata, using Python. Crafted aircraft generation, status, and notification website, using HTML, CSS, and JavaScript.

Education

Bachelor of Science in Computer Science, *University of Central Florida,* 2015

- **National Collegiate Cyber Defense Competition Champion,** 2014
- **Treasurer, HackUCF** 2015
